Thanks to its powerful 64-bit data bus, Jaguar delivers real-world, real-time game play, true-color graphics and stereo CD quality sound that other game systems can't touch. The bus acts like a 64-lane freeway, permitting data traffic to flow 64 bits at a time. Compare that to the cramped country roads of the 32-bit and 16-bit game systems and you'll see why they suffer from slow animation speed, choppy game play, grainy graphics, and poor sound quality.

Advanced technology is just the beginning.

In addition to the killer games for Atari Jaguar already on the market, there are a ton of new games coming to harness the insane power of the 64-bit system. Experience sports games so intense you'll feel the turf burn. Combat games that'll drain pints of your blood.

And dizzying virtual reality games like  
Doom and Alien vs. Predator.

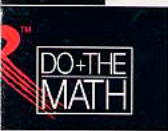

Jaguar's 64-bit technology gives you  
the features and functionality  
you need now, while supplying the  
power and components, such as  
virtual reality and CD-ROM capabilities  
you'll demand in the future.

Put it this way—nothing's going to come  
along to knock Jaguar off the top.

But hey, don't take our word for it.

The Atari Jaguar has been voted  
best hardware system in Europe  
and America. And it's the only system  
made in America.
